Horses talk to each other's "buttons". Find out how you can talk to them too using Horse Speak®.

You know your horse is talking to you.
 Horse Speak® decodes what they are saying and lets you respond in a language they already understand.
 Using the information from the Equine Mandala®, find out why the horse is bucking, biting, spooking, refusing to leave their friend, not walking over the tarp, won't pick up a certain lead, etc.
